Assignment -1 Python Programming

| Assignment Date | 24 September 2022 |
|---------------------|-------------------|
| Student Name | Sharan D |
| Student Roll Number | 195002108 |
| Maximum Marks | 2 Marks |

1. Split this string

2. Use .format() to print the following string.

Output should be: The diameter of Earth is 12742 kilo meters.

```
planet = "Earth"
diameter = 12742
print("The diameter of {planet} is {diameter} kilometers.".format(planet = "Earth", diameter = 12742))
print("The diameter of Earth is 12742 kilometers.".format(planet = "Earth", diameter = 12742))
```

3. In this nest dictionary grab the word "hello"

```
d = {'k1':[1,2,3,{'tricky':['oh','man','inception',{'target':[1,2,3,'hello']}]}]}
```

- 4. Numpy
 - a. Create an array of 10 zeros?

b. Create an array of 10 fives?

5. Create an array of all the even integers from 20 to 35

6. Create a 3x3 matrix with values ranging from 0 to 8

7. Concatenate a and b

```
a = np.array([1, 2, 3]), b = np.array([4, 5, 6])
```

8. Pandas

a. Create a dataframe with 3 rows and 2 columns

9. Generate the series of dates from 1st Jan, 2023 to 10th Feb, 2023

```
import pandas as pd
    print(pd.date_range(start='01/01/2023', end='02/10/2023'))
DatetimeIndex(['2023-01-01', '2023-01-02',
                                            '2023-01-03',
                                                           2023-01-04
                                            '2023-01-07',
                            '2023-01-06',
               2023-01-05',
                                                           '2023-01-08'
                                            '2023-01-11',
               '2023-01-09', '2023-01-10',
                                                           '2023-01-12'
                                            '2023-01-15',
               '2023-01-13', '2023-01-14',
                                                           '2023-01-16'
               '2023-01-17', '2023-01-18',
                                            '2023-01-19',
                                                           '2023-01-20
                                            '2023-01-23',
               '2023-01-21', '2023-01-22',
                                                           '2023-01-24
               '2023-01-25', '2023-01-26',
                                            '2023-01-27',
                                                           '2023-01-28
               '2023-01-29', '2023-01-30',
                                            '2023-01-31',
                                                           '2023-02-01'
               '2023-02-02', '2023-02-03', '2023-02-04', '2023-02-05'
               '2023-02-06', '2023-02-07', '2023-02-08', '2023-02-09',
               '2023-02-10'],
              dtype='datetime64[ns]', freq='D')
```

lists = [[1, 'aaa', 22], [2, 'bbb', 25], [3, 'ccc', 24]]
